

JUNK LAND

Print and Play Prototype notes

Thanks for downloading!

The following pages are the latest prototype used in the development of the game. Feel free to circulate these files with the instructions. I'm always looking for feedback and would welcome more playtesters! More information on getting involved in playtesting can be found on my website: playconfidencegames.com

Included in these files are cards for 1-4 players of Junk Land. Two different sized cards are in Junk Land: Resources are about 1.75" by 2.5". I highly recommend placing Resources into sleeves with 1 & 3 being on opposite sides, and 5 & 10 being on opposite sides.

The 2.5"x3.5" work best when sleeved with some cardstock to give them some snap for shuffling. My method is to cut these out on normal printer paper, then sleeve them into Fantasy Flight plastic sleeves that already have a cardstock in them.

If you have any questions, comments, concerns, or quandaries, please email me at playconfidencegames@gmail.com.

Enjoy!
